## 75% of Earth's Population Doesn't Have A Soul

I enjoy listening to “**Megan Rose Medium**” on YouTube who is the author of “**Welcome to the Future: An Alien Abduction, A Galactic War and the Birth of a New Era.**” Megan Rose said she was kidnapped by Aliens twice -- once when she was 5 years of age and another time when she was 9. She said the second time was worse than the first but both times she was rescued by Commander Val Nek (pictured on top right), from the Galactic Federation. She has kept in contact with him and even has a **Galactic implant** so they can communicate back and forth with each other, especially if she has any more trouble. Unlike the implants that the CIA and other government agencies implant in people's brains, which can be quite intrusive

From MeganRose

"It is my greatest honor to dedicate this book to all the children of planet earth who have been tortured, raped, abused and murdered at the hands of the dark forces. May your souls feel the freedom of victory as we rise together as champions of this galaxy" -Welcome to the Future dedication

We are the champions of the world 🌍

and hard to remove, the Galactic Federation implants are non-abrasive and easy to remove.

I believe **Val Nek** is **Pleiadian** and Megan admitted that she looks a lot like the **Pleiadians**. She described the **Galactic Federation** especially Val Nek as being 7 feet tall while looking like humans except for his bigger eyes. Many Pleiadians have blond hair and all of them look around 40 years of age according to Megan. Unlike Earthlings, many Offworlders don't age like us, and we too will stop aging and get younger (around 30 years of age) after we ascend into a 5D earth. Med Beds will be a good first start especially if they do Age Regressions, but after the **#SolarFlash**, we all will get our **#SpiritualGifts** back and we will also be able to heal our ourselves. The Quantum Financial System (QFS) won't exist in the 5<sup>th</sup> Dimension because we won't need money to survive. By the time we reach the 6<sup>th</sup>, 7<sup>th</sup>, and other dimensions, because of our high vibrations and frequencies, we won't need to eat food anymore. In the 5<sup>th</sup> dimension, we will stop harming animals, especially holding dog and horse races, or hunting animals for food. We won't eat meat and there will be many **#NewFruits** and **#LiveFoods** introduced into our diets. Many are saying they have already cut back, especially on meats, and others say they are only eating smoothies.

I watched Val Nek tell Megan Rose on one of her YouTube videos recently that 75% of the earth's population doesn't have a soul. Megan was quite shocked by the statistics and so was I, but I knew the 7 billion number of people on earth had been thrown around for years and probably was nowhere near correct especially when I found out in 2020, that everything we had learned since we were born was a complete lie. If 75% of people on Planet Earth don't have a soul then what are they – clones, avatars? Many people said clones only last for three (3) years so many are expecting people to start dropping dead at any minute especially since many of the clone's handlers might have been GITMOED.

## The Tall Greys and Draco Reptilians – #TheBadETs

Aa I stated in a past newsletter the **#BadETs, Tall Greys and Draco Reptilians**, have been removed

from Earth by the **Galactic Federation** so there is no need to fear **Aliens, UFOs, or ETs**. Supposedly, during President Dwight Eisenhower’s administration, Jan. 20, 1943 – Jan. 20, 1961, his cabinet or someone in power close to him gave permission for the **Tall Greys** and the **Draco Reptilians (aka #TheBadETs)** to kidnap and experiment on people of the Earth. I have heard numerous interviews with Laura Eisenhower, Dwight D. Eisenhower’s great granddaughter, and she was adamant that her grandfather never gave permission to the ETs to kidnap and experiment on people. She said he was a Farmer and Mennonite and basically a good person. So is it possible that Eisenhower did not know that others around him had given this permission – maybe.

## The Tall and Short Greys, #TheGoodETs

There are different species of Greys. In the past, you could be kidnapped by ETs or UFOs while you are sleeping. You might only be gone for 5 or 10 minutes. Also, according to Dolores Cannon, you can also be kidnapped along with your vehicle while driving or while you are parked somewhere and experience a **#LostTime** event. This is when you appear back in the same spot, but it is hours later.

According to Dolores Cannon, ETs have been on Earth for as long as we have. They are here to help us. The little Greys, which are a version of the Taller Greys are biologically created beings or ‘robotic beings’ that are the **“worker bees”** or **“gophers”** for the Taller Greys. They travel by raising their vibrations. Because the Taller Greys don’t like our density, they try to stay out of our atmosphere, so they send in the Smaller Greys. When they have to take tests on humans, the Smaller Greys have to take humans to the Taller Greys’ spaceships. Some people wake up with bruises because they have to lower the vibrations to bring them back into this dimension so you might also have **temporary paralysis** if you wake up at the wrong time. If you find **three (3) triangle shapes** (it might also look like an L) on you that is when you have been brought on the Tall Grey’s spaceships for upgrades. The machines leave marks, but it isn’t negative according to Dolores Cannon.

They communicate with signs that they make in some of the crops. The cattle manipulation is when they test the cattle to see what we are eating, and they also test plants. They come here for certain minerals that we don’t need so their Council said they can come but now as the world has become more populated, they had to make deals with our government. However, the government went back on their words even though they could read their minds. A lot of the information they gave the government, like stealth bombers, was supposed to be used for peace, but the government made bombs out of it. But because of the oaths taken by the ETs, they can’t intervene with our government unless it looks like they are going to destroy the Earth.

It is just different forms of life. They have different races

– THESE ARE JUST 4 OF THE GALACTIC FEDERATION FAMILIES WHO ARE FIGHTING FOR HUMANITY IN THE WORLD TO FREE US FROM THE SATANIC CABAL WHO HAVE VIEWED US (WE THE PEOPLE) AS THEIR SLAVES FOR 26,000 YEARS – OUR THANKS CAN NEVER BE ENOUGH FOR WHAT THEY DO FOR WE THE PEOPLE, DESPITE THAT THEIR LOSSES WERE VERY GREAT AGAINST THE REPTILES, THEY HAVE NOTHING BUT LOVE FOR HUMANITY IN THE WORLD

of people from all over the universe especially on the Motherships, which can be miles and miles long. We only see the smaller spaceships. The ETs will eventually appear everywhere at the **same time** so the government can’t deny that they exist but there will still be people who won’t believe it. However, by then we will be traveling in space. They will give us clean energy and we will never die. They don’t understand how we can kill anyone. They want us to stop the violence then we can join with them. They love our species and do want us to join them eventually, but they don’t like all the violence on Planet Earth. The 3D earth is damaged -- the water, the sky, the animals but people aren’t getting the message fast enough and there isn’t time. They tried to send energy into the earth, but it wasn’t enough. We will be shifting to the New Earth and millions of people will be leaving at that time because they won’t be able to survive the high frequencies. The old earthers won’t even know it has happened. We don’t need to be held back by fear according to Dolores Cannon.
